

YOUR ADVANTAGES

AC•THOR & AC•THOR 9s

- Easy installation
- Plug in like a household appliance
- Heating power is linearly controlled
- Maximizes self-consumption

AC ELWA 2

- More power: 3.5 kW
- Ease of use thanks to the touchscreen display
- Flexible control options via network cable or WLAN
- Heating power is linearly controlled

ELWA

- Connection to power grid is not necessary
- Patented hot water backup for bad weather conditions
- 100 % hot water without additional heat sources in summer
- Lower operating costs

WHY MY-PV?

Customer satisfaction is our top priority.

We are a pioneer in photovoltaic hot water preparation.

We have over 25 years of experience working with renewable energy.

We stand for innovation, progress and professionalism.

We offer adaptable and versatile solutions.

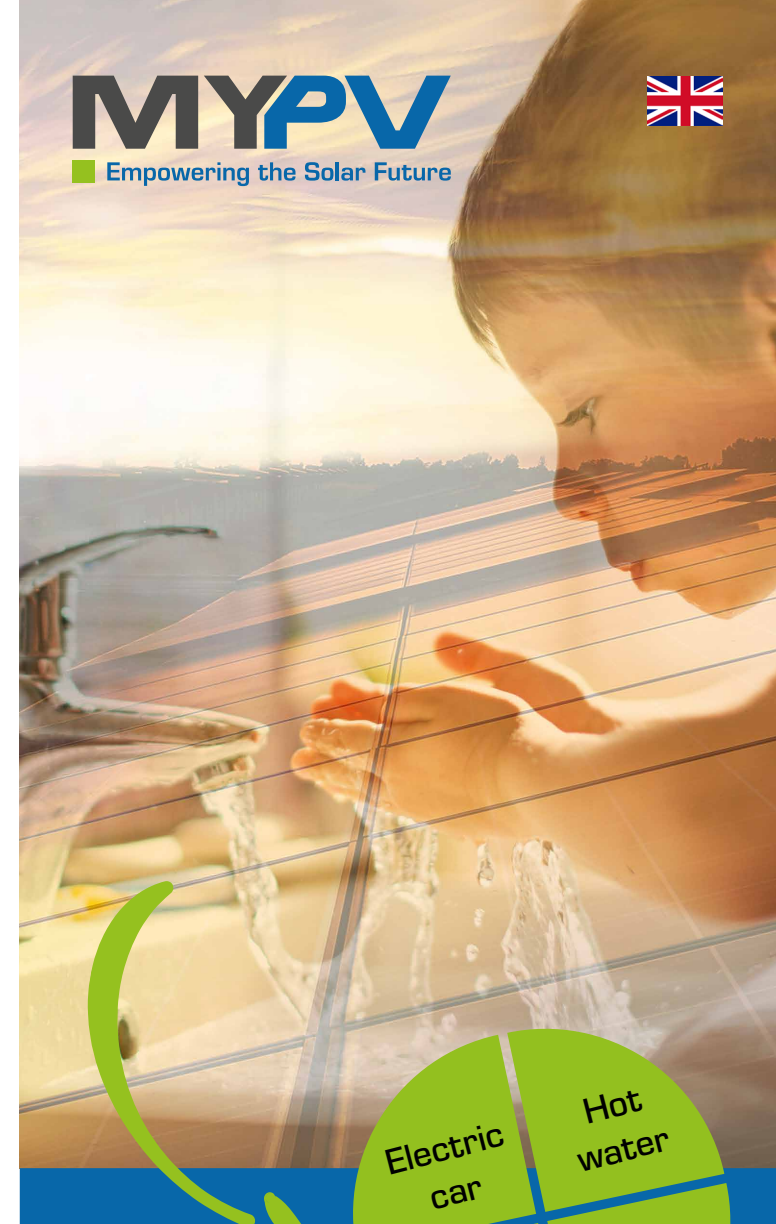

We are an Austrian company.

We are internationally successful.

Empowering the Solar Future

How can I get more out of my photovoltaic system?

Photos and graphics: my-PV, www.Stoak.com

www.my-pv.com

DO YOU WANT TO GENERATE AND USE ELECTRICITY YOURSELF? WE SHOW YOU THE EASIEST WAY.

Yes, I already have a photovoltaic system.

I would like to make the best use of my self-generated photovoltaic electricity - for household electricity and hot water.

Yes, I have an immersion heater.

No, I don't have a photovoltaic system yet, but I would like to have one.

No, I don't have an immersion heater.

I want to use **all** my photovoltaic energy for hot water.

The solution is obvious ...

AC·THOR or AC·THOR 9S , my photovoltaic Power Manager for hot water and heating
