

[Press Release, 29 April 2026](#)

Dual Leadership at my-PV

Philipp Baumgartner drives Internationalisation of my-PV

By expanding its management team, photovoltaic heating specialist my-PV is setting the course for continued growth. Since 1 April 2026, Philipp Baumgartner has been supporting Dr. Gerhard Rimpler, the company's CEO since 2011, as Managing Director Commercial Operations. While company founder Rimpler continues to oversee all technical matters, industrial engineer Baumgartner now leads the commercial divisions, with a particular focus on international sales.

Baumgartner combines both technical and commercial expertise, holding a degree in Industrial Engineering as well as a Master's in Business Consulting and an MBA.

Employer Branding and Sustainable Technologies

Since 2004, the 46-year-old Austrian has held various senior management positions, primarily at international companies in the heating and refrigeration technology sector. Throughout his career, he has consistently focused on advancing sustainable technologies, optimising value chains and strengthening employer brands – with considerable success.

At his previous employer – a refrigeration and heat pump company with around 300 employees – he increased revenue by more than 90 per cent over nine years while significantly improving profitability. He also spearheaded the company's transition to natural refrigerants and heat pump technologies. His strong commitment to employer branding and the strategic recruitment of highly qualified talent contributed to the company receiving the "kununu Top Company Award" in 2025 and achieving a top-three ranking in "Austria's Leading Companies".

Attracting, Retaining and Developing Talent

By expanding its management team, my-PV is laying the foundation for its next phase of development. Baumgartner says:

"In the DACH region, my-PV is already one of the market leaders in photovoltaic heating and solutions for optimising dynamic electricity tariffs. Alongside leading the commercial divisions, my primary focus will be on driving international expansion beyond Germany, Austria and Switzerland. To support my-PV's continued growth, I will work on attracting, retaining and

developing top talent, further improving organisational efficiency and strengthening the company's employer brand. I very much look forward to these exciting challenges.”

“With this step, we are sending a clear signal of continuity, internationalisation and further professionalisation. Philipp Baumgartner is the ideal addition to our management team, both professionally and personally. This will also allow me to focus even more on the company's technology strategy,” says Dr. Gerhard Rimpler.

Press Meetings at Intersolar Europe

At Intersolar Europe, the world's leading trade fair for the solar industry, taking place from 23 to 25 June 2026 in Munich, my-PV will present its photovoltaic heating solutions at the stand of its partner KOSTAL Solar Electric in Hall B3, Stand 130. Visitors and interested journalists will have the opportunity to meet Philipp Baumgartner in person. Individual press meetings can be arranged via email [through the press contact](#).

About my-PV

Located in Neuzeug, Austria, the manufacturer my-PV GmbH was founded in 2011. Since then, it has developed into a major manufacturer for photovoltaic water heating systems. Since 2018, my-PV has also been thinking solar-electrically in the heating and space heating sector. In August 2021, the company relocated to its unique solar-electric headquarters at Betriebsstraße 12, 4523 Neuzeug, Upper Austria. At this site, my-PV develops and manufactures devices that connect photovoltaic systems with thermal applications. The company currently employs 75 people.
